BACKGROUND
Europa is a modern sans serif typeface resulting from the contradictory combination of geometric reduction and humanistic vitality. Despite the distinct geometrical touch and characterful roughness it can be used for both text and headline purposes due to optical modulation rather than metrical construction providing optimised legibility in small sizes. Its name refers to the origins of its inspiration. The main influences were two big European sans serifs: the geometrical sans serif Futura (by Paul Renner, 1927) and the British humanistic sans serif Gill Sans (by Eric Gill, 1930). General proportions were chosen to provide good reading fluency. Modern capital letter widths give a balanced overall impression. The moderate x-height (two-thirds of the capital height) leads to economical tracking without neglecting legibility. Slightly narrowed letters (e.g. oval O/o) create visual harmony and good contrast in body text. Articulate ascenders, diagonally cut up-/downstroke endings and pointed angles at the baseline diagonals create distinct dynamics and prevent unwanted uniformity. Fractured stem-curve intersections provide a more open print image in small size (using less black ink). A range of OpenType features, ligatures, additional glyphs and figure format offer professional designers additional typographic options and make it a versatile typeface for various uses.

FORMATS
.otf → PostScript-flavoured OpenType
.ttf → TrueType OpenType
Multi-platform compatible for Macintosh & Windows

OPENTYPE FEATURES
Contextual alternate for lowercase "a"
Lining / medieval, proportional / tabular figures → 4 sets
Ligatures → ff ffi fi ffj fl ffl fft / fj ft
Prebuilt fractions → ½ ⅓ ⅔ ¼ ¾ ⅛ ⅜ ⅝ ⅞
Superscript/Subscript
Numerator/Denominator

ADDITIONAL GLYPHS
Arrows, check boxes, icons etc.

SUPPORTED LANGUAGES / UNICODE RANGE

Homo erectus and Neanderthals migrated from Africa to Europe before the emergence of modern humans. The bones of the earliest Europeans are found in Shkoder, Albania and dated at 1.8 million years ago. *The earliest appearance of anatomically modern people in Europe has been dated to 35 000 BC. Some locally developed transitional cultures (Szletian in Central Europe, Châtelperronian in the Southwest)*

use clearly Upper Palaeolithic technologies at very early dates and there are doubts about who were their carriers: H. sapiens, Neanderthal or the intermarried population of the same species. Nevertheless, the definitive advance of these technologies is made by the Aurignacian culture. The origins of this culture can be located in what is now Bulgaria (proto-Aurignacian) and Hungary. By 35 000 BC, the Aurignacian culture and its tech*nology had extended through most of Europe. The last Neanderthals seem to have been forced to retreat during this process to the southern half of the Iberian Peninsula. Around 24 000 BC two new technologies/cultures appeared in the southwestern region of Europe: Solutrean and Gravettian. The Gravettian technology/culture has been theorised to have come with migrations of people from the Middle East, Anatolia, and the*

Europas Fläche beträgt 10.532.000 km². Der Kontinent ist dabei umgeben vom Atlantik und dessen Nebenmeeren. Er liegt ganz auf der nördlichen Halbkugel. Die Nordspitze bildet das auf der *norwegischen Insel Magerøy gelegene Nordkap auf 71° 12' nördlicher Breite, die Südspitze die Punta Marroqui an der Straße von Gibraltar auf 36° nördlicher Breite, der östlichste Punkt liegt im nörd-*

lichen Ural auf 65° östlicher Länge, der westlichste Punkt ist das portugiesische Kap Roca auf 9° 30' westlicher Länge. Europa dehnt sich damit über 74 Längen- & 35 Breitengrade aus, in Nord-Süd-Richtung erstreckt es sich über 4 000, in West-Ost-Richtung über 5 600 km. Die Grenze zu Asien verläuft am Ostfuß des Urals und der Mugods*haren über Emba, die Nordküste des Kaspischen Meeres, die Kuma-Manytsch Senke zum Asowschen Meer und an dessen Ostküste bis zur Straße von Kertsch, durch das Schwarze Meer, den Bosporus, das Marmarameer und die Dardanellen. Es gibt zahlreiche Halbinseln (Skandinavien, Italien, Iberische Halbinsel, Balkanhalbinsel) und Inseln*

Avec plus de 720 ou 980 millions d'habitants sur une surface réduite pour une moyenne d'une langue pour 4,3 millions d'habitants, l'Europe bénéficie d'une grande richesse ethnoculturelle et d'une pluralité de *langues. Les cultures germaniques, slaves, latines et finno-ougrienne sont traduit-es par la diversité des langues parlées: 128 langues et dialectes ont des racines indo-euro-*

péennes; latines et grecques au sud, germaniques au nord et au nord-ouest; slaves à l'est et en Europe centrale, seul le groupe des langues finno-ougriennes (regroupant le finnois, estonien et le hongrois) et la langue basque ne font pas partie des langues indo-européennes. Administrativement, l'allemand, *l'anglais, le russe, le français, l'espagnol et l'italien dominent mais l'Europe est linguistiquement beaucoup plus riche puisque les 50 États européens (tous souverains, hormis Gibraltar) de la grande Europe géographique regroupent 35 langues officielles, enrichies de 225 langues secondaires et non officielles.*
